IDENTIFIERS *Oklahoma

ABSTRACT

The purpose of the report is to enumerate current (for the year ending June 30, 1975) data on manpower supply and demand on selected occupations and training programs in Oklahoma. An introduction explains how the data were acquired. The tables list occupations, the number of workers in demand for each occupation, and the number of workers (primarily from vocational-technical and adult training programs) in supply. The occupational supply is tabulated according to its educational source: vocational-technical schools (secondary, postsecondary, and adult) or other educational supply (Federal, private schools, and Oklahoma Employment Security Commission registrants). A separate column indicates the numerical difference between the two. There is a separate table for each of 11 regions in the State. The report cautions that its data are to be viewed dynamically and not to be regarded as absolute values. (Author/PR)

OTIS

OCCUPATIONAL TRAINING INFORMATION SYSTEM

CYCLE SEVEN REPORT 1975

ATTENTION

In lieu of the present economic condition, it is important that the reader understands that the data presented is the best information available on the manpower supply and demand estimated to exist during the time July 1, 1974, to June 30, 1975. The figures in the manpower supply and demand tables should be viewed dynamically and not regarded as absolute values. This is especially true with certain industries where changes in the plans of a single firm could significantly influence the manpower demand in a given occupation. Any information of manpower needs is subject to error due to shifts in the economy, unexpected new industry starts, and other intervening variables.

William W. Stevenson

Oklahoma State Department of Vocational and Technical Education

Division of Research, Planning, and Evaluation
Information Services Unit
Stillwater, Oklahoma
January, 1975

FOREWARD

The Occupational Training Information System (OTIS) was designed to provide current information on the supply and demand for people trained in selected vocational and technical occupations. Since its inception in 1968, those responsible for operating the system have constantly sought to improve and make the information more usable. OTIS is an excellent example of the application of theory to the solution of critical problems in vocational and technical education.

OTIS is a valuable tool to the administrator faced with the decision of program selection. The growing emphasis on accountability in the entire field of education creates the necessity on the part of those responsible for program offerings to allocate the scarce training dollar to those areas where the greatest need exists.

We are pleased that a number of state agencies, school districts, teachers, and guidance counselors utilize the OTIS publication to plan training programs and to help direct students toward occupational goals. It is our hope that the OTIS Cycle Seven Report will prove to be helpful to both the educator and the student.

Stillwater, Oklahoma
January, 1975

Francis Tuttle, State Director of
Vocational and Technical Education

ACKNOWLEDGMENTS

This report is the result of the efforts of a great number of people in a number of agencies. The agencies that have contributed to the growth and continued development of the Occupational Training Information System (OTIS) are:

Board of Nurse Registration and Nurse Education
Governor's Comprehensive Manpower Planning Staff
Manpower Administration, U.S. Department of Labor
Manpower Development & Training Division
Oklahoma Employment Security Commission
Oklahoma Industrial Development Department
Oklahoma State Department of Vocational and Technical Education
Oklahoma State Office of Community Affairs and Planning
Oklahoma State University: Research Foundation, Manpower Research and Training Center, and School of Occupational and Adult Education
Ozarks Regional Commission

Among those whose contributions helped to make the report possible are Dr. Francis Tuttle of the Oklahoma State Department of Vocational and Technical Education who provides continuing support and leadership, Mr. Will Bowman, Mr. Bill Hunter, Dennis Martin, and the staff of the Planning and Research Division of the Oklahoma Employment Security Commission who made notable contributions with their provision of the updated demand information and registrants supply data for the report.

Appreciation is expressed to the vocational education teachers, to all of the state supervisors of the Oklahoma State Department of Vocational and Technical Education, to Dr. Charles Hopkins, Dr. William Frazier, Mrs. Vickie Kurrasch, Mrs. Nancella Dobbins, Mrs. Karen Thomas and her staff for their help in the collection and processing of the data provided by the State Department, and to Mr. Bob Patton and his staff for their assistance in printing. We are indebted to Dr. Gene Smith, Mrs. Edwina Lyle and Mr. Ron Kraft with the Systems Design and Computer Services for their assistance with the data in the Student Accounting System.

We are indebted to Mr. Bob Keck with the State Regents for Higher Education for his excellent cooperation and for providing the student data from certain institutions. Credit should be given to Miss Frances Waddle and her staff of the Board of Nurse Registration and Nurse Education for their cooperation in obtaining the number of registered nurses and licensed practical nurses. Credit should also be given to Ken Hager

and his staff in the Oklahoma Council for Health Careers, (particularly Marsha Andres and Vicki Coffman) for their cooperation and assistance. In addition, thanks is expressed to Mr. Hugh Lacy and the CETA staff for providing information on their graduates.

Mr. Rucker Blankenship, Mr. Jerry Morton, and Mr. Andy Dean of the Governor's Comprehensive Manpower Planning staff should be commended for gathering information from the federal programs under their supervision for the manpower supply information.

Appreciation is expressed to Mr. E.R. Jeffers, Executive Secretary of the Oklahoma Private School Board, for the benefit of his experience and advice and for giving us the privilege of using their files on the Oklahoma private schools to gather required information on graduates in that sector.

We are indebted to the OTIS Advisory Committee for their guidance and direction in the future improvement of this system. The committee is listed below.

OTIS Advisory Committee

Mr. Arch B. Alexander
Deputy State Director
State Department of Vocational and Technical Education

CHAPTER I

INTRODUCTION

History of OTIS

It became apparent in Oklahoma that if existing manpower training and related agencies were to make their maximum contribution to the development of human resources, intensive efforts would have to be made in the direction of statewide manpower planning. The recognition of a need for statewide manpower planning is manifested in federal and state legislation, legislative acts, and in the establishment of coordinating committees and commissions in Oklahoma and in the nation. However, the need remained for the development and demonstration of an effective information system and related procedure for implementing statewide manpower planning.

In Oklahoma, two studies which explored the need for statewide manpower planning were completed in 1967. One was by Ling-Temco-Vought System Management Service and the other by Oklahoma State University. These studies were oriented toward identifying the actions and sequential steps necessary for the establishment of a flexible occupational training system that could provide skilled manpower to satisfy the state's present and future demand. In the spring of 1968, representatives from the Research Department of the Industrial Development and Park Department, the State Department of Vocational and Technical Education, and the Oklahoma Employment Security Commission met to discuss the needs for a statewide research and demonstration project. This project would bring maximum resources to bear on implementing the strategy for economic development which had as its major premise the development of a skilled labor force. Subsequently, the Manpower Research and Training Center at Oklahoma State University was approached to react in detail to the feasibility of such a project. In July of 1968, a proposal was submitted to the concerned agencies whereupon the State Department of Vocational and

Technical Education and the Industrial Development and Park Department agreed to a preliminary funding of the project. Cooperation was provided by the Oklahoma Employment Security Commission and the Association of Private Schools.

Organizations which supported and/or cooperated in the development of the system included the Oklahoma State Department of Vocational and Technical Education, the Manpower Administration of the U. S. Department of Labor, the Oklahoma Industrial Development and Park Department, the Ozarks Regional Commission, the Research Foundation for Oklahoma State University, the Oklahoma Employment Security Commission, the State Accrediting Agency, the Manpower Research and Training Center at Oklahoma State University, the School of Occupational and Adult Education at Oklahoma State University, and the Oklahoma Research Coordinating Unit.

At an OTIS Advisory Committee meeting in January, 1970, the members representing these organizations transferred operational responsibilities to the newly formed Division of Research, Planning, and Evaluation of the Oklahoma State Department of Vocational and Technical Education.

Purpose

The purpose of this report is to enumerate current data on manpower supply and demand on selected occupations and training programs in Oklahoma.

Limitations

The data presented here represents the best information available on the manpower supply and demand conditions estimated to exist during the time July 1, 1974, until June 30, 1975. However, the figures in the manpower supply and demand tables should be viewed dynamically and not regarded as absolute values. This is especially true with certain industries where changes in the plans of a single firm could significantly influence the manpower demand in a given occupation. Any information of manpower needs is subject to error due to shifts in the economy, unexpected new industry starts, and other intervening variables.

Procedures

The procedures used to collect and analyze the data in this report are presented in two major sub-sections; these are manpower supply and manpower demand.

Sub-Section One - Manpower Supply

There are seven primary sources of manpower supply data used in this report; i.e., the Oklahoma State Department of Vocational and Technical Education, the Governor's Comprehensive Manpower Planning Staff, the State Accrediting Agency, the Oklahoma Employment Security Commission, the Oklahoma Board of Nurse Registration and Nurse Education, the Oklahoma Council for Health Careers and the State Regents for Higher Education.

The Student Accounting System operated by the Oklahoma State Department of Vocational and Technical Education provides information on three categories of manpower supply; i.e., high school vocational program graduates, post high school vocational program graduates, and adult vocational program graduates. The files for the Manpower Development Training Act (MDTA) and Comprehensive Employment and Training Act (CETA) graduates are maintained in the State Department office and are used as the source for "Federal" supply data.

The data entered into the tables in Chapter II for secondary and post secondary vocational and technical students are calculated in the following manner:

1. The first phase of the problem was to find the percentage of the 1973-74 students who have dropped out or completed each of the vocational programs and to find out how many are available for job placement. This was done by searching the Student Accounting System for:

    a. Those who dropped out of school and are employed full time in the field for which they were trained (Student Status Report, Code J)*

    b. The number of students who are unknown (Student Status, Code O)*

    c. Those who are not available for placement (Student Status Report, Codes E, F, H)*

    d. Those who are available for placement (Student Status Report, Codes A, B, C, D, I)*

e. The total number with completion response (Student Status Report, Codes A through L and O)*

f. The total number enrolled in the program for each occupational objective

The percentage of students who dropped out of school and are employed full time in the field for which they are trained or completed the program and were available for the labor market was calculated by:

$$PC = \frac{a + d}{a + d + b + C} \times \frac{f}{e}$$

If there was insufficient information to calculate the percentage, the percentage was based upon, "A Follow-Up Study of Graduates, 1974," Oklahoma Department of Vocational and Technical Education.

2. The second phase was to calculate the numbers of students available for the labor market by accumulating the number of students who completed the program (Student Status Report, Codes A through F, H, I)* from the 1973-74 Student Accounting System and multiplying it by the percentage worked out above for each occupational objective.

Secondary programs, other than vocational-technical programs, funded by the State Department of Vocational-Technical Education, provide input into the labor market. A survey of the Oklahoma City and Tulsa school systems was used as a sample for industrial arts programs. Nine statewide samples of schools were used in obtaining information on business and office training programs. Supply input has been calculated from the results of these surveys and is included in this publication.

The figures entered into the tables in Chapter II for adults are calculated by searching the Student Accounting System and other available records for:

g. The number of adult preparatory students,

h. The number of adult supplementary students in adult classes for each occupational objective

The formula used to calculate percentage available for the labor market was:

$$PC = \frac{g}{g+h} \times .89 \times \frac{\text{(Student Status codes ABCDI)}}{\text{(Student Status codes A through F, H, I)}}$$

The factor .89 was used to eliminate duplicated enrollment. The adult enrollment for 1973-74 was used to calculate the figures in the table in Chapter II.

One hundred percent of the graduates in the Federal programs is listed as available to the labor market.

Data on private school graduates were obtained from the license application required annually by House Bill 1403 and from telephone conversations with selected private schools' administrators. This licensing procedure is supervised by the State Accrediting Agency.

The Oklahoma Employment Security Commission provides the number of qualified registrants who are available to fill jobs listed in the OTIS Report.

The Oklahoma Board of Nurse Registration and Nurse Education and the Oklahoma State Department of Vocational and Technical Education provide data on the number of nurses who are available for the labor market.

Sub-Section Two - Manpower Demand

The primary data on manpower demand utilized in this report has been developed by the Oklahoma Employment Security Commission (OESC) based upon a comprehensive survey conducted during 1971 with an original sample of 2,633 firms. The firm listing included firms covered by the unemployment insurance laws and was augmented by a mixture of the larger non-covered establishments such as government agencies, hospitals, and other non-profit organizations. These firms were listed by industrial divisions in descending order by employment size. All of the establishments comprising the upper 50 percent of the industry's employment total were included in the survey. Of the remaining firms in the industry, 20 percent and 5 percent samples were selected from the third and fourth quartiles respectively. During June of 1971 questionnaires, job descriptions, and instructions were mailed to the surveyed firms. For the next two months, personal visits were made to the state's largest employers to solicit their cooperation. The OESC was able to survey 83.8 percent of the employment in the areas surveyed.

For the OTIS Cycle Seven Report, the data base was updated by the Research and Planning Division of OESC. Basically, the update consisted of reviewing the larger firms' employment changes. These were analyzed to see if they were following the previously

projected trend. Those establishments that varied from their forecast were contacted by OESC personnel to confirm the change and secure new projections. Furthermore, all newly established large firms were visited by OESC personnel to get employment information. This data was then incorporated into the data base and used to update the demand information.

The 1973 survey of health occupations which was conducted by the Oklahoma Employment Security Commission in conjunction with the Oklahoma State Department of Vocational and Technical Education was used to supplement the demand information. This survey sampled employers in the health occupations, such as hospitals, nursing homes, government agencies, and private practice. The Oklahoma Employment Security Commission combined all of the data from the agencies above and edited it in terms of known economic conditions to produce the figures interfaced in the manpower demand column of the tables.

Other manpower demand information has been developed by Jesse B. Mitchell, "Employment Opportunities and Educational Needs in Off-Farm Agri-Business Occupations in Oklahoma," State Department of Vocational and Technical Education, September, 1971, and by the Oklahoma State University Agricultural Economics Department's Farm Manpower projections.

CHAPTER II

MANPOWER SUPPLY AND DEMAND TABLES

How to Use the Tables

The Net Additional Manpower Requirements Table utilizes the clustering of related occupations which are matched with programs that train workers for those occupations. A cluster may contain one or more occupations and one or more types of programs. The occupations are identified by Dictionary of Occupational Titles codes and the programs are identified by U.S. Office of Education Codes. The occupations are indexed for statewide totals and Descending Ordering of Program Clusters tables on the last three pages of the report. Some of the clusters are limited by the form of available data; demand data on drafting is not reported by level of drafting skills needed and, therefore, all levels of training are interfaced against the aggregate demand for draftsmen.

The vocational and technical supply is subtracted from the demand to obtain demand minus vo-tech supply. When demand exceeds supply, the demand minus vo-tech supply is positive; where the demand is less than the supply, the demand minus supply is negative. The negative numbers are indicated in the tables by the negative sign (-). Other supply, such as Federal, private schools and OESC registrants will be considered when calculating the net manpower requirements.

Although many factors influence the choice of program offerings in any given situation, one of the major considerations is the demand for the graduates of the program. When planning new programs or selecting a possible future occupation, one should examine the net manpower requirements within the region where the program will be offered, in the adjacent regions, the net manpower requirements in the Standard Metropolitan Statistical Area (SMSA) closest to the region, and the statewide net manpower requirements. In addition, any factor which influences the local labor market such as new industry starts should be considered.

CHAPTER III

A DESCENDING ORDERING OF PROGRAM CLUSTERS RANKED BY DEMAND MINUS VOCATIONAL-TECHNICAL SUPPLY

In this chapter a descending rank order of program clusters by demand minus vocational-technical supply is presented. The program cluster with the greatest net manpower demand is ranked one (1) and is followed in order by the program clusters with lesser demand.

It must be remembered that the net manpower demand figures are only projections not absolute values. Comparison of the ranks of specific clusters must be accompanied by an examination of the difference in net manpower demand between the clusters.

The rank ordering is provided as a simple analysis of the tables. It may be used to quickly identify program clusters by vocational and technical divisions in which training is needed on a statewide and/or regional basis.

NOTE:
All students who are not on this printout but are enrolled in your program this year should be recorded on the enrollment form (SAS-1).

As the armed forces is voluntary, consider former students who are now in the armed forces as being employed.

INSTRUCTIONS:

I. For each student on this report who was in your training program last year and is enrolled in the program again this year:
   1. Check to see if the student's social security number is correct. If it is not, write the correct social security number in the space (blocks) provided above the printed social security number.
   2. Check to see if the student's occupational objective number has changed. If it has, code the correct occupational objective code (see codes on back of sheet) in the space (blocks) provided above the printed occupational objective code.
   3. Write the name of the vocational class that the student is attending on the shaded line in the column headed Vocational Class.

II. For a student on this report who has completed the training program, dropped out, transferred, or whose status is unknown enter the appropriate alphabetic letter listed below, in the column headed Alpha Letter.

III. For a student who was not in your program last year, enter the alphabetic letter "P" in the column headed Alpha Letter.

Alphabetic Letter	COMPLETED THE TRAINING PROGRAM AND IS
A	Working full time--in occupation for which trained
B	Working full time--in Related occupation
C	Working full time--in Unrelated occupation
D	Working part time (does not include those in school full time)
E	Continuing education full time in Related Vocational - Technical Field
F	Continuing education full time in Unrelated Vocational - Technical or other field
G	In school in other course work
H	Not employed and Not seeking
I	Not employed but is seeking
	DROPPED OUT OF THE PROGRAM AND IS
J	Working full time--in Field for which trained
K	Working full time--not in Field for which trained
L	Not employed full time
M	Remaining in School
N	TRANSFERRED to another school
O	Unknown or Deceased
P	Was not in training program
Q	Comprehensive Home Ec
